Facility Solutions

KEY BENEFITS

- Tool-less Components – ¼ turn connections; double O-ring design
- Simple, locking two-door design
- Large, easy-to-use activation paddles with locking catch
- Individual bucket fill and bottle fill hoses
- Easy-clean drip tray with drain tube connection.
- Easy-read product selection knobs with defined “click” when turned to product choice.
- Tool-less cover removal for easy service of internals

A rugged wall-mounted system holding four concentrated bottles of chemical behind locked doors. The windows in the doors allow for sight of the product levels of each product concentrate taking the guesswork out of when to change the products. A dial-4 selector for both mop bucket fill and spray bottle fill. Built-in flow regulator makes dilutions accurate within a wide variety of water system pressures. The snap-out valve assembly makes tool-less service easy without the need to remove the cabinet from the wall. A.S.S.E. approved backflow preventors. Tubing and water connection hose comes pre-plumbed making the cabinet ready to hang right out of the box. Includes generic product identification labels.

Trusted solutions. – Simple. Clean. Connected.

TECHNICAL DATA

Flow Rates

1 GPM (3.8 LPM) bottle fill
4 GPM (15.2 LPM) bucket fill

Back Flow Prevention

Flex-Gap or Aire-Gap

Maximum Water Temperature

140° F (60° C)

Minimum Pressure

20 PSI (1.4 bar)

Maximum Pressure

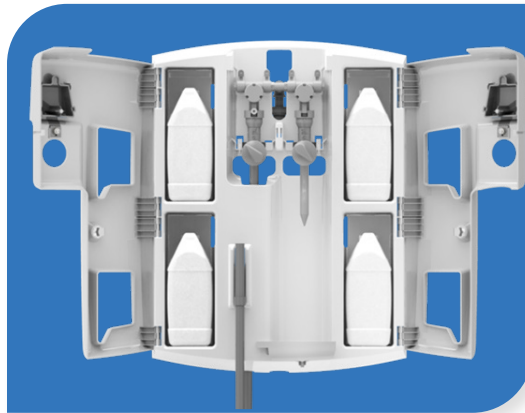

100 PSI (6.9 bar)

Certifications

A.S.S.E.
I.A.P.M.O. (UPC)
